Subject: RE: Some questions.....an answer to #1 - CPG Data CDs

The CDs received from the CPG for the Caged Bivalve Study and Small Forage Fish Tissue Data reports contain the pdfs of the data packages from the analytical laboratories not the validated electronic data deliverables (EDDs) in region 2 format.

We will need the validated EDDs to complete the review of these reports to facilitate review of the stat tables. Is it possible to request the final validated EDDs from the CPG – or an Access database similar to what they provided for the SV CWCM events will work as well.

Sharon
